

Heat Trace

Most snow and ice melt applications are best served by using our self-regulating heating cable. The RoofHeat cables can be installed in roof gutters and downspouts to keep your home safe from dangerous ice damage and frost erosion.

Our self-regulating roof and gutter cables feature advanced technology that results in effective, energy-efficient operation. The irradiated conductive core increases its heat output as the temperature falls, and decreases its output when the temperature rises. These cables feature durable construction and UV protection, and are one of the industry's premier heat trace solutions.

- * Fully Automated and Energy-Efficient
- * Extends the Lifespan of Roof and Gutters
- * Increases Property Value
- * Maintenance Free

Portable Heating Solutions

Staying productive during the winter months is essential for construction professionals. Powerblanket® portable heating solutions help to ensure productivity during cold weather by offering ground thaw and freeze protection for materials and all types of equipment. A wide variety of specialized Powerblanket heating solutions are designed to enhance productivity and eliminate downtime and expenses associated with equipment. The outdoor heating mats can be used to protect pipes, pumps, valves, tanks, etc.

Powerblanket engine warmer

The outdoor heating solutions include weatherproof curing mats, barrel warmers, tote warmers and more.

Heated Walkways

Warmzone offers a wide variety of custom snow melting options so you can install radiant heat in your sidewalks, porches, stairs, and walkways, etc.

Features and benefits include:

- * Fully Automated, Energy-Efficient Operation
- * Enhanced Pedestrian Safety
- * Environmentally Friendly
- * Easy to Customize
- * Easy to Install
- * Eliminates Manual Snow Removal

The Radiant Heat Experts

Warmzone is a national radiant design and sales operation based in Salt Lake City, Utah. We custom design both electric and hydronic heating systems for interior and exterior applications. Our staff works directly with your installer to make these unique systems become a reality.

Call a Warmzone representative today for more information at **888.488.9276**, or email us at info@warmzone.com.

Heated Driveways

Exterior snow melting systems are some of the finest conveniences you can enjoy. Sit back and relax as snow and ice melt from your driveway, side-walks, and steps. Energy-efficient electric snowmelt systems are designed to provide maintenance-free snow melting in concrete, asphalt, stone and brick paver surfaces and more.

Fully automated radiant snow melting systems can be installed in a variety of applications, including: side-walks, ramps, patios, porches, steps, loading docks, etc.,

Each system can be customized to meet your specific snow melting and budget needs.

Roof De-icing

Roof de-icing and gutter heat trace systems are some of the best investments you can make to protect your roof from snow and ice damage. Freeze/thaw conditions can form dangerous ice dams along roof edges and icicles that can cause structural damage to gutters.

Snow accumulation creates heavy weight loads on roofs and are often dangerous and difficult to remove.

Fortunately, snow and ice can be cleared away with a

well-designed roof de-icing system. Warmzone offers the highest quality roof heating systems available for all types of applications, including new construction, remodeling, and existing roofs.

Underfloor Heat

Radiant floor heat is comfortable, clean and energy efficient. The benefits of radiant floor heating systems make them an ideal solution for any new construction or remodeling project. If you plan on heating select rooms or your entire home, you won't find a better, more customer-oriented provider than Warmzone.

Warmzone offers one of the largest selections of radiant floor heating systems on the market. Each system is backed by industry-leading

customer services, including professional system design, free installation training, and installation support.

Contact a radiant heat expert at Warmzone to learn more about the many floor heating options that are available to meet your heating and budget needs. Call 888.488.9276 or visit www.warmzone.com today.

We Include Professional Design Layouts

Warmzone's free quote and consultation services have been featured on HGTV and on Bob Vila's Home Again program. Customers ranging from homeowners to trade professionals depend on Warmzone to create the best, most reliable heating system to meet their unique heating and budget needs. Call 888.488.9276 or visit www.warmzone.com today.
